

Sport Kayak SE330

The Most Kayak for the Least Money

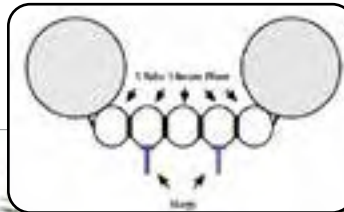

The Sea Eagle 330 and 370 Sport Kayaks are 2 of the most popular inflatable kayaks in America. We have now sold over 300,000 of these incredibly popular inflatable kayaks, with over 60,000 being sold in just the last five years.

And it's no wonder - the SE330 is just 26 lbs., takes only minutes to inflate and holds one or two adults. Extra thick, special formula hull material allows them to take plenty of abuse and last many years, however, they are incredibly economical to buy and own.

They can be carried in a car trunk, shipped as luggage, stowed in a closet, and be ready in minutes to paddle remote mountain lakes, run mild whitewater rivers or romp in ocean surf.

2 Skegs provide Directional Stability
